### REMARKABLE POINTS ON THE MARKET

The market struggled as main indexes closed around reference. The market opened excitedly as investors received positive data on America inflation last night. However, the gain was quickly narrowed as pillar codes differentiated strongly. On the other hand, midcap and penny groups still attracted attention from investors. Therefore, there were still more gainers although the indexes were mainly flat after that. Some positive gaining groups were real estate, construction, fertilizer, and chemical. Foreign trade was also remarkable as they returned to a net buying after 5 previous net selling sessions.

### TECHNICAL POINT OF VIEW

In technical term, VN-Index dropped again. The volume increased and stayed above 10 and 20-session average, showing selling pressure. However, the index still stayed above MA5, and MA5 tended to cut up to MA20, showing that short-term recovering trend is still there and the drop might only be a technical shake. Moreover, MACD increased to above Signal, maintaining buying sign, and +DI cut up to -DI, showing chance of gaining, and the index might soon gain to challenge resistant level of 1,089 points (MA200). For HNX, HNX-Index was more positive. It saw the 4<sup>th</sup> gain in a row and stayed above MA5, and MA5 was above MA20, showing that short-term recovering trend is still there. The index might surpass pressure from resistant level of 215 points (peak of April) to challenge 229 points (MA200). In general, the market is still on short-term recovering trend after the correction on May 11. Therefore, investors should use the technical shake to restructure the portfolio, with priority on good fundamental codes with positive growth prospect that can attract the cash flow.
