Aqua products export: will see many advantages in second half of the year

According to Vietnam Association of Sea product export and processing (VASEP), Vietnam biggest sea product export market – America is expected to recover from second half of the year with lower inflation, lower inventory, and higher service demand at year-end. This helped export value to this market increasing by 40-50% YoY. Meanwhile, for EU market, Tra fish selling is still increasing and stable. Japan, Korea, and China expect slightly higher demand from the end of Q3/2023.

Tra fish is imported the most among sea products imported to America from Vietnam. In 5 months, America imports 31,300 tons of Tra fish, down by 49%. However, there are still some products with higher import to America like flounder up by 179%, sword fish by 49%, pollock by 16%, especially, fish paste, fish ball, and grounded fish meat up by nearly 10 times YoY.

Shrimp export to China in May is 78 million USD – the highest since the beginning of the year. It still saw negative growth but the drop was lower than previous months (March drop was 40%, April was 22%, May was 11%). In May, China is at the lead on importing shrimp from Vietnam, accounting 23% weight. America is next with 21%.

For shrimp market in near future, Ms. Kim Thu - VASEP specialist stated that it is still a tough time but many positive forecasts were made on Vietnam shrimp export prospect in the last few months of the year. The recovery might not be as strong as last year but it at least will be better than the beginning of this year.
