REMARKABLE POINTS ON THE MARKET

The market saw another drop with smaller dropping range. The morning trade was quite gloomy as the index only struggled around reference with low liquidity. The market leaned on sellers but the pull from VHM and VIC and oil codes helped the index from dropping too deeply. However, the situation got worse after lunch break as selling pressure spread widely. Not only blue-chips, midcap and penny codes also saw strong selling sign. Even oil codes that gained consistently in the morning also differentiated in the afternoon. Therefore, the indexes closed at day lowest level.

TECHNICAL POINT OF VIEW

In technical term, VN-Index saw another drop. The volume stayed above 20-session average, showing that the cash flow is still strong. Not just that, the index stayed above MA20 that increased, and MA5, 10, and 20 still differentiated positively, showing that the main trend is still recovering, this drop might only be technical correction. However, the index dropped to below MA5, and MACD cut down to Signal and RSI dropped to below over buying level, showing that selling pressure is increasing and the correction might continue, with support around sentimental level of 1,200 points (MA20). Therefore, investors should be more cautious on high-price-chasing purchase on surfing positions. For HNX, HNX-Index saw similar situation. The index dropped and broke MA5 but still closed above MA20 that increased, showing that the main trend is still recovering and the drop might only be technical, with close support around 237 points (MA20). In general, the market is in a technical correction to support recovering trend. Therefore, investors might use technical shakes to restructure the portfolio, main target is on good-fundamental codes with positive business prospect that can attract the cash flow.
