### REMARKABLE POINTS ON THE MARKET

Green took control on Vietnam stock market on Monday. After struggling in the first few minutes, main indexes gained under the lead of real estate and securities. The market leaned completely on gainers as the demand also spread positively on many other groups. However, correcting pressure on some blue-chips like VCB, MSN, GAS, and SSB was the main reason making VN-Index not able to see stronger gain. The liquidity was high, showing that the market is still attracting cash flow. On the other hand, foreign trade saw negative sign with strong net selling today.

### TECHNICAL POINT OF VIEW

In technical term, VN-Index saw another gain. The volume increased and stayed above 20-session average, showing that the cash flow is quite strong. Not just that, the index surpassed MA5 pressure and stayed above MA20 that increased, and ADX stayed above 46 and +DI was still above -DI, showing that recovering trend is still there and the index might move to challenge target level around sentimental level of 1,300 points. For HNX, HNX-Index saw similar situation. It gained strongly to above sentimental level of 250 points and stayed above MA20 that increased, showing that recovering trend is still there and the index might move to challenge sentimental resistant of 300 points. In general, the market is still on recovering trend after the gain on August 14. Therefore, investors might continue on surfing trades, having priority on good-fundamental codes with positive business prospect that can attract the cash flow.
