REMARKABLE POINTS ON THE MARKET

The market was in green again at the end of the week. Opening with a positive gaining gap but main indexes only moved within a small range in remaining time as many investors were still cautious. The liquidity increased slightly but was still lower than average. For the groups, banking gained again which was the main motivation that pulled the index up. Real estate and securities attracted the cash flow but the demand only focused on some remarkable codes like PDR, NLG, and HCM. Besides, the cash flow tended to move to midcap and penny codes today, especially sea product, fertilizer, and chemical. Therefore, the market also saw more gainers. Foreign investors returned to a net buying today.

TECHNICAL POINT OF VIEW

In technical term, VN-Index gained again. The volume stayed below 10 and 20-session average, showing that the cash flow is still cautious. Not just that, the index hasn't escaped MA5 pressure, and MACD tended to cut down to Signal, showing selling sign, and correcting pressure is still there with risk of dropping to support level of 1,160 points (MA20). However, the index still closed above MA20 and 50 that increased, and ADX increased to 26 with +DI being above -DI, showing that the main trend in short-term is still recovering. Therefore, correcting sign might only be technical and it is an opportunity to restructure the portfolio with target of moving to close resistant around 1,200 points or further on 1,250 points (peak in September 2023). For HNX, HNX-Index also gained again. However, the index was still on Sideway trend around MA5 and 20 that are meeting and being flat within 225-235 points, but with gaining sign from old bottom support and MA50, showing that the index might move to challenge upper line of Sideway channel. In general, the market is supporting recovering trend after the gain on January 26. Therefore, investors might use technical shake to restructure the portfolio more reasonably. In which, having priority on good-fundamental codes with high Q4/2023 profit growth and positive 2024 prospect.

Rice market in 2023: rice export is at record, expecting to still be positive in 2024

According to General Department of Customs, Vietnam rice export in December is 492,387 tons for 338.7 million USD, down by 18% in volume and 15.4% in value MoM, but up by 13.3% in volume and 53.8% in value YoY.

However, 2023 is considered a successful year for Vietnam rice with export of over 8.1 million tons for 4.67 billion USD, up by 14.4% in volume and 35.3% in value YoY. This is a record figure since 1989 when Vietnam started exporting rice.

This result also helped Vietnam staying at number 3 on rice export after Thailand and India.

In 2023, Vietnam rice export price increased by 18.3% YoY to an average of 575 USD/ton. Especially, there were many times that Vietnam rice export price reached the highest, even above Thailand and India.

Early 2024, some rice companies stated to receive orders from partners at a rather high price.

Wood and wood product export to Canada dropped remarkably

Department of Import-export (Ministry of Industry and Trade) showed that wood and wood product export value to Canada in December is 22 million USD, 39% higher than December 2022.

The Department stated that wood and wood product export to Canada increased in the last few months of the year but still wasn't enough to compensate with the drop from the beginning of the year. Therefore, in 2023, wood and wood export value to this market still dropped remarkably to 205,5 million USD, down by 13% YoY.

USD free rate increased by 1.7% from the beginning of 2024

Ending 2023, SBV stated that the rate is 3.04% higher than the beginning of the year. In December 2023 alone, the rate dropped by 0.04% MoM. USD dropped strongly since the market expects more from FED stopping raising interest rate and will soon reverse the policy in 2024 which was the main reason for the rate dropping since November.

On free market, USD buying-selling rate on January 25 reached 25,070 and 25,120 VND/USD. Comparing to January 24, free USD rate increased strongly by 70 dong on buying and 20 dong on selling sides. From the beginning of January, USD free rate has increased by 1.7%.
